MISLINJA

SL

Plezališče Mislinja je majhno področje na Koroškem z 42 problemi. Primerno je za začetnike ter tudi za zahtevnejše plezalce. Balvane v Mislinji je prvi našel Mislinjčan Gorazd Robnik - Goga, ki je z lokalnimi soplezalci tja zahajal na rekreacijo. V letu 2014 se mu je pridružil Rok Klančnik, ki je s prijatelji poleti 2014 očistil večino balvanov, jih preplezal ter poimenoval.

Lastništvo

Velik del plezalnih površin je javnih, prav tako parkirišče. Na zasebnem zemljišču je samo en balvan, poimenovan Armada (blok 15). Bodite skrbni in poskrbite, da narava ostane nedotaknjena!

Kamnina

Pohorski granit/tonalit. Ostra skala, neprijazna koži. Prevladujejo majhne poličke (*krimpi*).

Najprimernejši čas

Celo leto razen zime zaradi možnosti večjih količin snega. Najboljše jeseni ali spomladi.

Zahvale

K razvoju balvanskega območja Mislinja so pripomogli Rok Klančnik, Gorazd Robnik, Tomaž Žužel, Rok Bricman, Andrej Jež in drugi.

EN

Mislinja is a small bouldering area in the Koroška region. There are no more than 42 lines, but it's appropriate for both beginners and experienced climbers. The first boulders in Mislinja were found by a local, Gorazd Robnik – Goga, who used the area for recreation with his friends. In 2014, Rok Klančnik gathered his friends and cleaned most of the boulders, then climbed and named them.

Ownership

The land and parking spaces are mostly public. There is only one boulder on private land – Armada (bloc 15). Be extra careful and take good care of nature!

Rock type

Pohorje granite/tonalite. Sharp rock, not finger-friendly. Mostly small edges (*crimps*).

Best time

Whole year except winter. Large amount of snow possible. Best in autumn and spring.

Thanks to

Climbers who helped with the area development: Gorazd Robnik, Tomaž Žužel, Rok Bricman, Andrej Jež and others.

ST

Dostop:

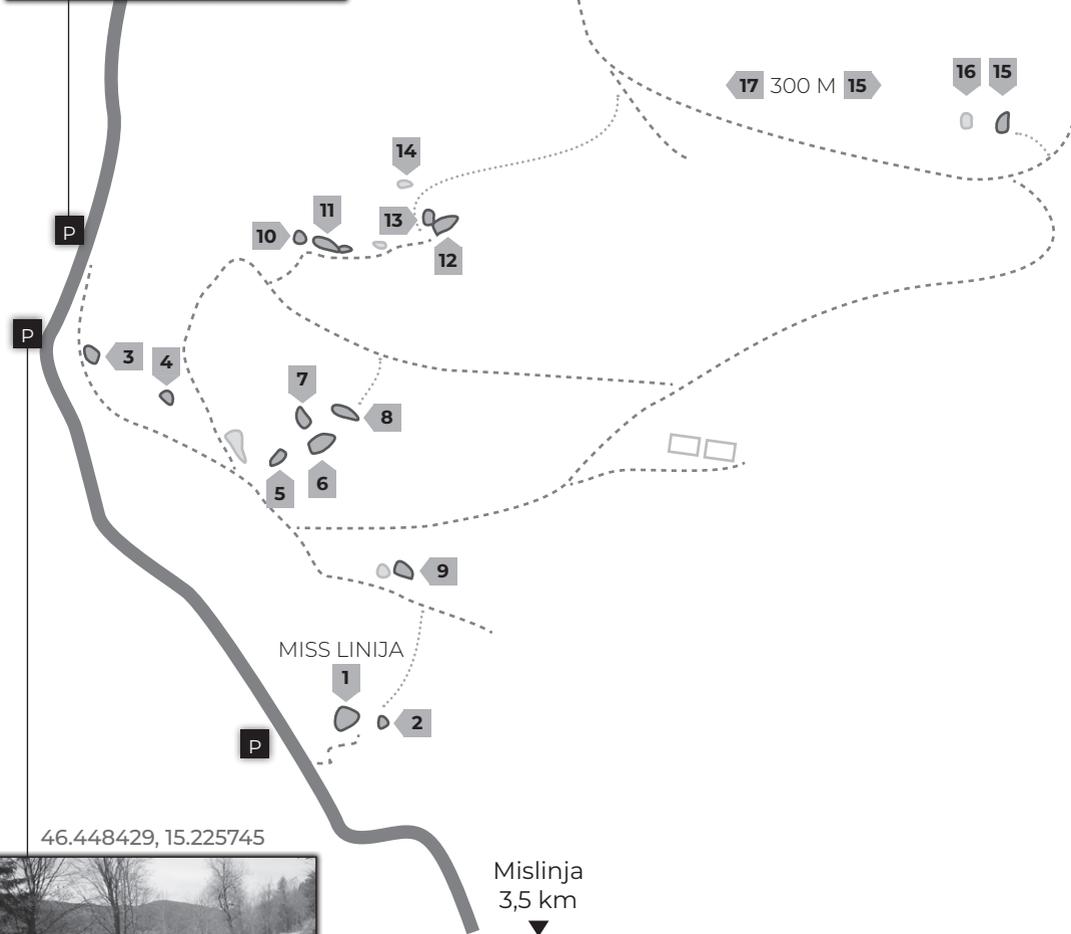

Cesta nas vodi iz smeri Slovenj Gradca proti Velenju. V Mislinji tik pred klancem navzdol zavijemo levo pri oznaki za Tolsti Vrh. Po asfaltirani cesti se peljemo še okoli 3 km in nato na 180° ovinku zavijemo levo na makadam, po katerem peljemo še 500 m. Na levi strani ovinka je parkirišče za dva avtomobila. Do balvanov dostopamo 20 m naprej po cesti, nato zavijemo ostro desno na gozdno cesto.

EN

Approach:

Take the road from Slovenj Gradec to Velenje. In Mislinja – just before the road descends – turn left at the signpost for Tolsti vrh. Drive another 3 km on the asphalt road and then at the 180 ° curve turn left onto a dirt road. After another 500 m, there is a parking space for two cars on the left side of the curve. Reach the boulders by following the road for 20 m and then turn sharp right onto a forest road.
